

# Master STAGES™ CLEAN 2017

## Economical Heavy-duty Spray Cleaner

Master STAGES™ CLEAN 2017 is an economical heavy-duty spray cleaner that removes heavy soils and oily residues from ferrous and magnesium parts. Often used in rebuild operations and for cleaning up cast iron, stamped or drawn steel parts, or removing heavy RP coatings.

### Immersion

Immersion washers effectively remove residue from light to heavy soils, light rust, coolant, oil, drawing compounds, lubricants, waxy soil, and corrosion inhibitors. Designed for cleaning aluminum, steels, cast iron, stainless steels, alloys, brass, bronze, copper, and magnesium and for multiple-metal situations, Master STAGES highly-concentrated cleaners allow immersion washers to run at lower concentrations and lower temperatures with increased bath life, less foam, and added corrosion protection.

Environmentally friendly, and free of SARA 313 reportable ingredients, cost-effective Master STAGES immersion cleaners ensure exceptional parts cleaning while using less product and less energy — for a better bottom line.

### Choose CLEAN 2017:

- Very economical way to remove heavy soils and light rust
- Low foaming at ambient temperatures, and even lower when used above 49°C
- Can be recycled using XYBEX® equipment
- Contains no solvents, borates, silicates, nitrites, or amines
- Long bath life
- Excellent compatibility with magnesium
- Will prevent flash rusting and provide one-to-two days of in-process corrosion inhibition if not rinsed

### CLEAN 2017 especially for:

**Applications** — corrosion inhibition, parts washing

**Soils** — coolant residues, greases, oils, sulphurised oils and waxes

**Metals** — cast iron, copper, magnesium, stainless steels, steels and titanium

**Industries** — automotive, bearing, general engineering, general fabrication, general industry, job shop, machine tool, medical and tool

**CLEAN 2017 is free of** — amines, borates, nitrites, silicates and solvents

## Economical Heavy-duty Spray Cleaner

### Application Guidelines

- CLEAN 2017 is normally used at concentrations from 1%-7%. We recommend 3% as a starting concentration to provide reserve surfactant.
- This product is suitable only for steel, stainless steel, cast iron, titanium, pure copper, and magnesium parts. Do not use on aluminium alloy, copper alloy, or zinc.
- Operating temperature should be between 21°C to 99°C for spray cleaning.
- CLEAN 2017 will work well in immersion washers as well as ultrasonic baths under 49°C.
- High pH cleaners such as CLEAN 2017 often produce "soaps" as part of their cleaning action. CLEAN B1 is effective at reducing foam resulting from the formation of these soaps and may be used in conjunction with CLEAN 2017.
- For additional product application information, including performance optimisation, please contact your Master Fluid Solutions' Authorised Distributor at <https://www.masterfluids.com/eu/en/distributors/index.php>, your District Sales Manager, or call our Tech Line at +49 211 77 92 85 - 13.

### Physical Properties Typical Data

|   |                 |
|---|-----------------|
| Colour (Concentrate)                          | Light yellow    |
| Colour (Working Solution)                     | Light yellow    |
| Odour (Concentrate)                           | Mild, detergent |
| Form (Concentrate)                            | Liquid          |
| Flash Point (Concentrate) (ASTM D92-90)       | > 100°C         |
| pH (Concentrate as Range)                     | 13.5 - 14.0     |
| pH (Typical Operating as Range)               | 12.5 - 13.0     |
| Cleaner Conductivity Factor                   | 0.00020         |
| Titration Factor (CL-1 Titration Kit)         | 0.36            |
| Number of Cleaner Vials (CL-1 Titration Kit)  | 1               |
| Cleaner Indicator A or B (CL-1 Titration Kit) | A               |

### Recommended Metalworking Concentrations

|                            |             |
|----------------------------|-------------|
| Design Concentration Range | 1.0% - 7.0% |
|----------------------------|-------------|

### Concentration by Conductivity

% Concentration = Conductivity in Micro Siemens x Factor  
Conductivity Factor = 0.00020

### Concentration by Titration

% Concentration = No. of Drops x Titration Factor  
Titration Factor = 0.36

## Economical Heavy-duty Spray Cleaner

### Mixing Instructions

- Recommended usage concentration in water: 1.0% - 7.0%.
- To help ensure the best possible working solution, add the required amount of concentrate to the required amount of water (never the reverse) and stir until uniformly mixed.

### Ordering Information

20-litre pail

204-litre drum

1000-litre IBC
